Create a shortcut for IE in the Start menu. You can optionally add a search string in the URL. This launcher will run IE as a Windows task, and open the page specified by the search string, and browse for the URL in the current window. You can register your own apps for certain URLs to be launched automatically after every Windows boot by using the Internet Explorer 7 URL association feature. Launch automatically after every Windows boot. To register your own URL for auto launch, add the URL as a "URL association" to Internet Explorer. The association should have the "URL" scope. "URL" means the URL you want to be launched automatically. "SCOPE" represents the scope the URL can be executed from. To add a URL association, select Tools > Internet Options. Click the "Content" tab. Select "URL and Search". In the "Add URL" text box, type the URL you want to be launched automatically. Select the "URL associations" option to add the URL association. In the "URL" field, select the scope from the list. By default, the "URL" option is set to "Open in a new tab". To remove an association, open the "URL and Search" dialog again, then uncheck the association. URL and Search Settings Choose the scope to add the URL association. Launch URL Specifies that when Internet Explorer is launched, the browser will navigate to the specified URL. Open in a new tab Specifies that when Internet Explorer is launched, the browser will open the specified URL in a new tab. Open in existing tab Specifies that when Internet Explorer is launched, the browser will open the specified URL in the current tab. When you launch a URL, Internet Explorer opens the URL in a new tab. This action can be performed by pressing Ctrl + T or right-clicking the URL and choosing Open in New Tab. To automatically launch URL when Internet Explorer starts up: Select Tools > Internet Options Click the Content tab Select Open in the "Choose what to do when Internet Explorer starts" drop-down menu. The default

A: For a regular ideal polygon with  $n$  sides, it is always possible to calculate the volume of its hyperboloid model: 
$$V_{\text{hyp}}(n) = \int_{\mathbb{H}} dv(h) = \int_0^\infty \frac{r^2}{2} dr$$
 where  $dv(h)$  denotes the volume form of the hyperboloid. Since this is a function of  $n$ , it is possible to compute it. Note that in the case of the disc model, for  $n \geq 3$ , the integral  $\int_0^\infty \frac{r}{\sinh\{r\}} dr$  is divergent in infinite value, so the
